

Protect Your Business with AxiShield

Your Comprehensive Cybersecurity Solution

There are many things to consider when selecting a cybersecurity solution, so many available options, it can be challenging to know which solution best fits the needs of your organization.

AxiaTP offers a robust and holistic cybersecurity solution, AxiShield, designed to not only protect your company but also educate your employees on avoiding potential threats. AxiShield is customizable to the needs of small and medium-sized businesses (SMBs), featuring automated reporting, dashboards, and streamlined management so you can see the value of your investment at any time.

The 4 Cornerstones of Our Cybersecurity Approach

1 Cyber Awareness

Cultivating a security-minded workforce is crucial. Our solution offers up-to-date cybersecurity training, equipping employees with the knowledge to stay alert and resist falling for phishing schemes.

2 Remediation Support

Our team provides 24/7 monitoring so that potential security risks are detected early, minimizing the chance of substantial harm to your operations. This allows you to relax, knowing your IT infrastructure is in capable hands.

3 Future Proofing

The cybersecurity landscape is in constant flux, and we adapt accordingly with continuous updates to anticipate emerging threats, ensuring your business always has access to the most current protective measures.

4 Cost-effectiveness

While implementing new systems may seem daunting financially, the benefits of cybersecurity services far outweigh the initial costs. Our transparent, flat-rate pricing structure also provides you with the flexibility to allocate your budget as needed.

Holistic Protection. Hassle Free. Cost Effective.

Protect Your Business with AxiShield

Core Capabilities

Email Security

Don't fall victim to phishing schemes and scams—our API-based email solution helps you stay ahead of potential email threats.

Cloud Data

Cloud data protection means your data stays safe and secure while maintaining the ability to collaborate with external users.

Cyber Awareness

Arguably the most important facet of cybersecurity is awareness. You and your employees will be in the know of evolving threats and ways to combat them.

External Footprint

Your digital footprint matters. Our actionable insights ensure all exposed vulnerabilities and external threats are made known by scanning your digital footprint.

Endpoint Security

Your devices are susceptible to cyber threats without proper protection. We help you avoid threats like malware and ransomware through endpoint security.

Secure Browsing

Shield your business from ransomware attacks. Our advanced protection mechanisms prevent data encryption and loss, ensuring smooth operations even in the face of such threats.

Phishing Simulation

Humans often fall victim to email phishing and employees are the first line of defense against these cyber attacks. With our simulations, your employees experience realistic simulations of phishing attacks and learn how to identify them.

Cyber Insurance

Cyber risks can be extensive and insurance can help alleviate the burden. Experience tailored coverage at the right price.
